Problems and Problem Solving. What is a problem? In common language, a problem is an unpleasant situation, a difficulty. But in education the first definition in Webster's Dictionary "a question raised for inquiry, consideration, or solution" "is a common meaning.. More generally in education, it can be useful to define problem broadly " as any situation, in any area of life, where ...

Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

### **Complexity - Wikipedia**

Components of strategy. Professor Richard P. Rumelt described strategy as a type of problem solving in 2011. He wrote that good strategy has an underlying structure he called a kernel. The kernel has three parts: 1) A diagnosis that defines or explains the nature of the challenge; 2) A guiding policy for dealing with the challenge; and 3) Coherent actions designed to carry out the guiding policy.
