In physics, special relativity (SR, also known as the special theory of relativity or STR) is the generally accepted and experimentally well-confirmed physical theory regarding the relationship between space and time. In Albert Einstein's original pedagogical treatment, it is based on two postulates: . The laws of physics are invariant (i.e., identical) in all inertial systems (i.e., non ...

The history of special relativity consists of many theoretical results and empirical findings obtained by Albert A. Michelson, Hendrik Lorentz, Henri Poincaré and others. It culminated in the theory of special relativity proposed by Albert Einstein and subsequent work of Max Planck, Hermann Minkowski and others.

Emergent Cosmology. Authors: Alexandre Harvey-Tremblay Comments: 38 Pages. In this work, we aim to unify statistical physics with relativity. As such, we construct a system of statistical physics under an appropriate equilibrium condition such that its Lagrange multipliers imply, instead of the usual uniform constant temperature, a uniform constant speed: the speed of light.
