A project management information system (PMIS) is the coherent organization of the information required for an organization to execute projects successfully.

PROJECT MANAGEMENT INFORMATION SYSTEM

The Systems Approach. The definition of a system in dictionary terms as an "organization or complex whole; an assemblage or combination of things or parts forming a complex or unitary whole" provides a good point of departure to relate the meaning of a "system" to project management.

Defining a project management system - Systems Approach

It can also be described as an electronic information system used to plan, schedule, control, report, communicate, forecast and handle cost for most aspects of a project. According to (Project Management Knowledge, 2010) PMIS are system tools and techniques used in project management to deliver information.
